WHY FIRE AWARENESS TRAINING MATTERS

Fire can happen in any building, at any time. When it does, the actions and awareness of your people can make a significant difference to the safety of everyone on site.

Fire awareness training gives staff the knowledge and confidence to recognise risks, respond appropriately and help prevent incidents before they occur.

REDUCES RISK
Helps identify fire hazards and unsafe practices before they lead to an incident.

IMPROVES RESPONSE
Gives staff the confidence to react quickly and safely in an emergency.

SUPPORTS LEGAL COMPLIANCE
Helps you meet the requirements of the Regulatory Reform (Fire Safety) Order 2005.

PROTECTS PEOPLE AND PROPERTY
A well-informed team can help minimise injury, disruption and damage.

BUILDS A SAFETY CULTURE
Promotes awareness and accountability across your organisation.

REASSURES STAKEHOLDERS
Demonstrates your commitment to fire safety to employees, visitors and regulators.

> Fire awareness training is a simple, effective and cost-efficient way to make your workplace safer and more resilient.
